

FabSmart Summary Factsheet

This document highlights the key features available within FabSmart.

- Supports build to stock and build to order items
- Generates work order requests and work orders
- Work order requests can be generated on the fly or from the ERP system transaction (Bid or Sales Order)
- Track costs from components and value-add activities
- Manage kit definitions consisting of:
 - Paths (single or multiple)
 - Routing Steps
 - Components (stock and nonstock)
 - Work Centers
 - Activities
 - Instruction Profiles
- Co-products (additional sellable products) can be created as a result of the fabrication of a kit item
- Can specify minimum quantities to produce of a kit item
- Kits can be customized if applicable
- Kit paths can be sequential or in parallel
- Manual or automatic processing to next step of work order defined by profile
- Inventory tracked by work center and allocated to work order
- Instruction profiles used to define actual activity being done to work order
- Work order traveler can be printed to direct movement of work order through fabrication process
- Activity costs can be tracked hourly, by the finished good or by the work order (including branch specific costs)
- Pick tickets can be generated to pick component items
- Costs can be based off of "actual" or "planned" quantities or hours consumed
- Integrated to ERP system's General Ledger
- Integrated with StockSmart for processing of movement of inventory to/from work center

About Kerridge Commercial Systems (KCS)

KCS provides advanced, fully integrated business systems, installation and support services for the manufacturing, wholesale and distributive markets. The company has over 40 years of extensive knowledge and experience of working with wholesalers, distributors and manufacturers across many sectors. The company's class leading solutions are functionally rich and highly flexible.

The KCS product solution set has a track record of delivering wide-ranging benefits including greater operational efficiency, cost savings and resource and asset utilization, together with real-time information for management decision making.
